

# Information for tenants - Estate 62

April 2024

## Regulation of ventilation

As several tenants have experienced issues regarding the ventilation in their residence we have, in collaboration with the board, decided to install a new regulation in all residences. The regulation will provide a balanced ventilation system and inconveniences such as noise, positive and negative air pressures will be eliminated.

The regulation will take place in all residences. Afterwards all ventilation vents will be locked, and tenants are not allowed to attempt to regulate these themselves.

If you experience any issues surrounding the ventilation you always have to contact the service office.

The work will be completed by Ventilationsteknik ApS according to the following plan:

Number 36 will be regulated in week 18

Number 38 will be regulated in week 19

Number 40 will be regulated in week 20

A note will be placed on your front door stating the exact time for the regulation of your residence.

It is absolutely necessary that Ventilationsteknik can access all residences, otherwise the regulation cannot take place.

***IMPORTANT: If you are unable to be home on the day of the regulation of your residence, please drop off a key to Himmerland Service Idrætsbyen, Hadsundvej 180A. If you are not home and have not provided a key, we will enter the residence with the help of a locksmith.***

Kind regards  
Himmerland
